# BUILD YOUR OWN JET PACK

## WORK WITH YOUR GROWN-UP TO GATHER THESE SUPPLIES:

- 2 EMPTY TWO-LITER BOTTLES, 2 MILK JUGS OR 2 PAPER TOWEL ROLLS
- RIBBON, STRING OR A PAIR OF SHOE LACES
- CONSTRUCTION PAPER OR FELT
- CARDBOARD
- HOT GLUE AND/OR DUCT TAPE
- SCISSORS
- BONUS: SILVER PAINT

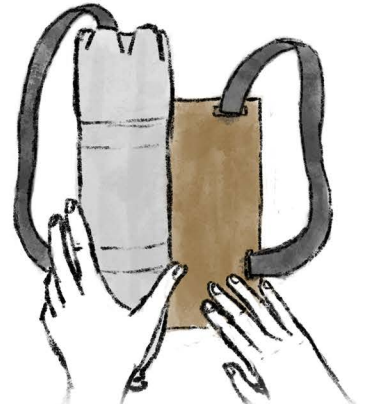

- 1** Cut a piece of cardboard roughly 12 x 14 inches.  
Cut a hole in each corner for your straps.

- 2** Take two pieces of ribbon or string (one for each side) and pull them through the holes, forming a backpack. Secure the straps to the cardboard with hot glue or tape.

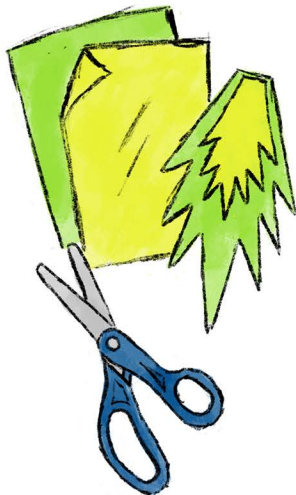

- 3** Glue or tape 2 two-liter bottles (or other similar shaped containers) to the cardboard with the top facing down.

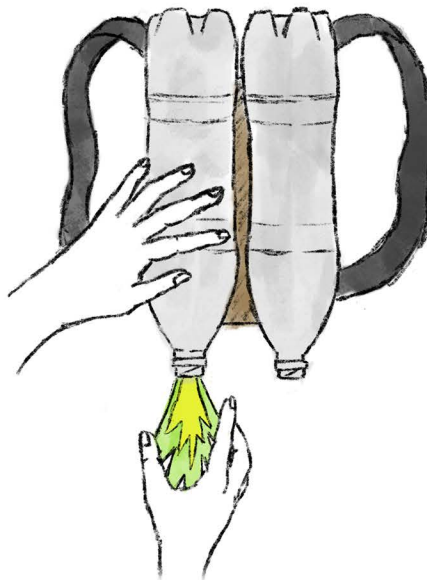

**BONUS:** Paint the bottles silver or wrap them in duct tape to give a metallic finish.

- 4** Cut two sets of flames from construction paper or felt with your favorite colors and glue/tape them together.

- 5** Glue or tape the flames to the opening of both bottles.

- 6** Decorate your jet pack and take flight!
